Research Fields

Labour Economics, Gender Economics, Applied Econometrics, Urban Economics, Digital Economics

Current position

Since 2023 **Postdoctoral fellow**, Bocconi University, AXA Gender Lab.

o Sponsored by Paola Profeta

Academics

- 2022-2023 PhD Research Fellow, Paris School of Economics, Labour Chair.
 - Sponsored by Dominique Meurs and Eric Maurin
- 2019-2023 PhD candidate in Economics, Aix-Marseille School of Economics.
 - o **Supervisors**: Cecilia García-Peñalosa (AMSE, CNRS, EHESS) & Christian Schluter (AMSE)
 - o Title: Supply side effects on gender wage inequality
- 2017 2019 **Master in Economics**, Aix-Marseille School of Economics, with honors, specialised in Data Science.
- 2014 2017 **Bachelor's in Economics**, Aix-Marseille School of Economics, 1st and 2nd year attended at Université Lille 1, specialised in Data Science.
 - 2017 Exchange program, Udem University of Montréal, Canada, with honors.
 - 2014 Baccalaureate, Lycée International Montebello, Lille, FR, with honors.

Research Visits

- 2022 2023 Paris School of Economics, Labour Chair.
 - May 2022 CREST, ENSAE, Institut Polytechnique de Paris, sponsored by Roland Rathelot.
- April 2022 Paris School of Economics, Labour Chair, sponsored by Dominique Meurs.

February and **Bocconi University**, AXA Research Lab on Gender Equality, sponsored by Paola March 2022 Profeta.

Publication

"Male and female selection effects on gender wage gaps in three countries" (single-authored) - Labour Economics - https://doi.org/10.1016/j.labeco.2024.102506

Abstract: A vast literature on gender wage gaps has examined the importance of selection into employment. However, most analyses have focused only on female labour force participation and gaps at the median. The Great Recession questions this approach because of the major shift in male employment that it implied. This paper uses the methodology proposed by Arellano and Bonhomme (2017) to estimate a quantile selection model over the period 2007-2018. Using a tax and benefit microsimulation model, I compute an instrument capturing both male and female decisions to participate in the labour market: the potential out-of-work income. Since my instrument is crucially determined by the welfare state, I consider three countries with notably different benefit systems – the UK, France and Finland. My results imply different selection patterns across countries and a sizeable male selection in France and the UK. Correction for selection bias lowers the gender wage gap and reveals a substantial glass ceiling with different magnitudes. Findings suggest that disparities between these countries are driven by occupational segregation and public spending on families.

Working Papers

"What do women want in a job? Household constraints, gender-biased preferences and the reservation wage gap" (Job Market Paper)

Abstract: Recent explanations of the gender wage gap emphasize the role of gender differences in job search, yet the role of household constraints remains underexplored. This paper uses French administrative data to investigate the importance of gender-specific decisions in the reservation wage gap, and specifically how household constraints shape women's reservation wage strategies. First, I assess the types of occupations that men and women apply for and the implications for the reservation wage gap. Using textual analysis, I create a novel dataset classifying occupations based on temporal flexibility and job content. Quantile decomposition methods allow me to document an unequal gap in reservation wage, intensifying along the distribution, partially explained by gender biased choices in the amenities of the desired job. I then assess to which extent a 2018 reform, which increased childcare benefits for single-parent households by 30%, influenced the reservation wage and job-search behaviour. Using a difference-in-difference strategy and spatial variation in childcare service availability, results indicate that the reduction in childcare costs led women to lower their reservation wages. I also find that more affordable access to flexible childcare increases the likelihood of targeting occupations requiring greater temporal flexibility and the desired maximum commute, thereby enabling them to secure more stable jobs upon re-employment.

"Gender Gaps in the Urban Wage Premium", with Cecilia García-Peñalosa (AMSE, CNRS, EHESS) & Christian Schluter (AMSE)

Abstract: We examine the economic geography of gender wage gaps to understand the role that location plays in gender earning differences. Using panelised administrative data for the universe of French workers, our findings indicate that women benefit relatively more from density than men, with an urban wage premium (return to urban density) 48% higher than for men. We identify a number of factors that explain this gap, with a large share being explained by the structure of the local labour market, notably, the extent of occupational segregation. Another important factor is commuting patterns, while childcare availability plays only a moderate role.

"Generative AI & Labor Market Discrimination", with Germain Gauthier (Bocconi University), Debora Nozza (Bocconi University) & Paola Profeta (Bocconi University)

Link to the AEA Pre-analysis Plan

Abstract: The rise of Generative Artificial Intelligence (GenAI) has led to the widespread adoption of automated CV generation services for job seekers and CV screening services for employers. We study the consequences of using GenAI for such tasks. We find that GenAI systematically reproduces and can even amplify gender biases. It generates gender-stereotyped CVs and recommends lower earnings for female job seekers. We also run a series of online experiments inspired by classical correspondence studies, which measure hiring discrimination by comparing employer responses to equivalent CVs that differ only by gender. Our results show that GenAI penalizes female candidates during CV screening in male-dominated occupations. These patterns persist even when models are explicitly instructed to remain gender-neutral. Our findings provide the first direct evidence that GenAI can reinforce structural labor market inequalities, potentially disadvantaging women at every stage of the job search.

Research papers in progress

- "Gender Norms and Child Development", with Hélène Le Forner (CREM)
- "Changing the media narrative: the role of social movements", with Caroline Coly (UB) and Mahima Vasishth (Bocconi University)
- "Is artificial intelligence turning the tables on gender wage inequality?", With Fabien Petit (UCL, University of Barcelona) and Paola Profeta (Bocconi University)
- "Beyond borders: The impact of women's migration on French native labour market outcomes", With Lydia Assouad (Harvard, LSE) and Cecilia Garcia Penalosa (Aix-Marseille School of Economics)

Research Activities

Conferences and Workshops

- 2025 Workshop in Gender Economics at ENS de Lyon*, 5th Discrimination and *scheduled Diversity Workshop*, LAGV 2025*, TASKS VII Conference: The Economic Impacts of AI on Work and Labor Markets*, MESIE CEPR Workshop, LSE workshop on gender equality, Gender inequality workshop at the London School of Economics, Discrimination and the Inequalities in the Age of AI Workshop at Sciences Po
 - 2024 ADRES 2024, Afépop 2024, Junior Research Day 2024, Junior Economist Meeting 2024, COSME workshop, 3rd Workshop on Public Policies, Urban Economics Association Conference 2024, IAAE Conference 2024, EEA-ESEM 2024, EALE 2024
 - 2023 ADRES 2023, 2023 Conference in Applied Econometrics using Stata, JMA 2023, AFSE 2023, LAGV 2023, ECINEQ 2023, GRAPE 2023 Gender Gaps Conference, EALE 2023, King's Junior research day 2023

- 2022 EDGE Jamboree Conference, European Association of Labour Economists Conference 2022 (EALE), International Association for Applied Econometrics (IAAE) Conference 2022, LAGV 2022, JMA 2022, 4th Queen Mary University of London Economics and Finance Workshop for PhD & Post-doctoral Students, 2022 French Stata conference in applied econometrics, and Workshop on Labour Economics 2022 (IAAEU).
- 2021 9th ECINEQ Conference (London School of Economics), ECINEQ PhD Workshop (London School of Economics)

Seminars

- 2025 Applied Economics Lunch Seminar of PSE, CREM Seminar at Rennes University
- 2024 ECONtribute and C-SEB Design & Behavior Seminar at Cologne University, Areena JMC Symposium, Dondena AI and Society Initiative Seminar at Bocconi University, Food for Thought Seminar at Bocconi University, Labour Chair seminar at the Paris School of Economics
- 2023 Applied Economics Lunch seminar at the Paris School of Economics, PhD seminar at the Aix-Marseille School of Economics, Labour Chair seminar at the Paris School of Economics, Bocconi Food for Thought seminar
- **2022** Food for Thought seminar at Bocconi University, AMSE PhD seminar, seminar of the Labor Chair at the Paris School of Economics, Firms and market seminar at CREST, Core Brown Bag Seminar at Louvain University
- 2021 PhD seminar (Aix-Marseille School of Economics)
- 2020 Empirical & Econometric Methods Sessions (Aix-Marseille School of Economics), PhD seminar (Aix-Marseille School of Economics)

Academic Responsibilities

- 2023 Now **AXA Gender Lab, Bocconi University**, Co-organisation of the seminar series.
- 2023 Now **AFÉPOP network**, Co-organisation of the AFÉPOP conference and communication management, https://afepop.fr/.
- 2024 Now Network WISPPRH x Gender Lab Bocconi x NYU Abu Dhabi of researchers in Gender Economics, Policy and demography, Co-organisation of the 2025 Workshop.
 - 2023 Ecineq PhD Workshop & Mentoring session, Organisation of the online workshop and of mentoring sessions with senior faculties during the 2023 Ecineq Conference.
- 2021 2022 Selected topics on PhD and research, Organisation of sessions with senior faculty for the PhD program, Aix-Marseille School of Economics.

 Co-organised with Camille Hainnaux, Jade Ponsard and Daniela Horta Saenz
- 2020 2022 Organization of the PhD Seminar, Aix-Marseille School of Economics, FR.
- 2020 2021 Organization of the *Informal talks and PhD Advice discussion series*, Aix-Marseille School of Economics, FR.

Refereeing

Refereed articles for: Labour Economics, Journal of Economic Inequality, CESifo Economic Studies

Awards and Grants

- 2024 Women and Science Chair Grant, Dauphine University, for the project "Generative AI and labor market discrimination", 10 000 euros.
- 2022-2023 Dissertation Scholarship, Labour Chair, Paris School of Economics.

- 2019-2022 PhD grant, Aix-Marseille University, Aix-Marseille School of Economics.
 - 2019 Winner of the master dissertation award, Institut du Genre.
 - 2018 **Winner of the Special Mention of the Jury**, Cercle des économistes, La Parole aux Etudiants, co-written with Sarah VINCENT.

Teaching

- 2025 **Gender Economics**, *Undergraduate en, 2nd year*, Sciences-Po, FR. Lecturer
- 2019 2022 Microeconomics, Undergraduate-fr, 1st year, Aix-Marseille University, FR.
- 2019 2021 **Econometrics of Qualitative Dependent Variables**, *Undergraduate-fr, 3rd year*, Aix-Marseille School of Economics, FR.
